Clapp affidavit' no medical claim possible; what judge indicated, etc.

I wonder if as Clapp swears the in-camera conferences were all off-the-record when they included the judge's notes and the providing of copies to both sides. I never saw these and think they now are relevant.

The note at the bottom proves the falisty of the judge having held that we could make no personal-injury claim. If we could not what purpose would be served by asking an environmentalist for a medical referral? (I had spoken to these people. They knew I had no money and bewailed their own financial condition. A woman who had worked for Bud worked there.)
